

Quality Assurance Specialist

About H2scan:

H2scan provides advanced hydrogen technology solutions that deliver early visibility into developing issues by helping operators make informed decisions, improve efficiency, prevent failures, reduce costly disruptions, and drive proactive risk mitigation.

H2scan is more than a technology provider. We are a trusted partner helping operators stay three steps ahead of failure - protecting personnel, strengthening infrastructure, and supporting a safer/more reliable energy future.

Founded in Valencia, California in 2002, with technology rooted in U.S. Sandia National Laboratories, H2scan has earned the trust of utilities and global manufacturers across critical infrastructure worldwide, as they face greater demands for safety, reliability, and uptime.

Location: On-site (Valencia, CA)

Type: Full-time, non-exempt, First Shift

Salary: \$34-36/hour

Reports to: Quality Assurance Manager

Job Description:

H2scan is seeking a Quality Assurance Specialist (first shift) to join our team and help develop advanced solutions for new high-tech markets. We are looking for a candidate who is a self-starter and takes ownership of their assignments. If you enjoy dynamic work environments, have excellent creative problem-solving skills, and are able to work independently and collaboratively, then this is the job for you.

Responsibilities:

- Facilitate CAPA investigations from issue identification through implementation of solution and effectiveness monitoring.
- Develop and implement quality control procedures and guidelines to ensure adherence to established quality standards and regulatory requirements.
- Conduct regular internal audits of processes, procedures, and products to identify areas for improvement and ensure compliance.
