

H2scan Product Obsolescence Notice

HY-ALERTA® 5020 & 5021 Series

Date: October 27, 2026

Dear Valued Customer and Partner,

H2scan is committed to providing reliable hydrogen sensing technologies that support safety, operational efficiency, and long-term performance across industrial applications. As part of our ongoing product portfolio evaluation and commitment to innovation, we are announcing the obsolescence of the **HY-ALERTA® 5020 and HY-ALERTA® 5021 hydrogen monitoring products**.

This decision reflects our continued efforts to streamline our product offerings, advance our sensing technologies, and focus on solutions that meet the evolving requirements of our customers and industry applications.

Products Affected

The following products are being designated as obsolete:

- **HY-ALERTA® 5020**
- **HY-ALERTA® 5021**

These products will be phased out of H2scan's active product portfolio and will no longer be available for new orders following the applicable discontinuation date.

Product Availability and Support

H2scan recognizes the importance of maintaining continuity for customers currently utilizing these products. We encourage customers and distributors to review their existing installations, inventory requirements, and future project needs to prepare for this transition.

Our sales and technical support teams are available to assist with product inquiries, existing system requirements, and guidance on alternative hydrogen monitoring solutions where applicable.
